

CAREER PROFILE

I'm interested in creating customized client solutions, developing artificial intelligence and cybersecurity. I'm skilled in process optimization, experienced in building procedures and proficient in applying cutting-edge technologies regardless of the environment and conditions.

EXPERIENCE

Own business

June 2023 - Present

Kamil Kaczmarek Solutions

- Developing simple solutions for clients, apps with OpenAI APIs underneath.
- Python, prompt engineering.
- Creation and automation of processes and procedures, system design and integration.
- Vulnerability analysis (SharpHound, BloodHound, theHarvester), OSINT (SpiderFoot, Maltego), SIEM (WAZUH)

Administrative Clerk

November 2022 - October 2023

Alpha Workforce Aps, Rotterdam

- Administrative work.
- Coordinate employee logistics using digital tools, including AI, ActiveCampaign, fleetman, optimoroute, Macro VBA (Excel) and others.
- Assist with large-scale project management (~300 employees) with a focus on building processes and procedures, with automation as the next step.
- Implementing AI in daily tasks for streamlining work and management (primarily delegating repetitive tasks to AI, creating simple UI apps).

Marketing Consultant

April 2020 - November 2022

Freelance

- Building ChatBots (ManyChat), Zapier, Macro VBA (Excel), various ad managers (Meta/TikTok).
- Development and implementation of online brand awareness strategies, management of systems (e.g. Booksy, Moment).
- Mailing and SMS campaigns.
- Systems integration, strategic planning, multi-platform advertising, customer relationship management.
- Proficiency in digital tools and platforms, diverse projects.

Data Collector

April 2019 - April 2020

IMG ARENA (former FlightScope) - European Golf Tour

- Taking measurements during European Tour golf tournaments, GPS support.
- Provide high quality real-time data for bookmakers, assist in training Neural Networks (data labeling), high precision, international experience.
- Fast data processing, high accuracy, ability to work in high stress situations, adaptability to different environments.

CERTIFICATIONS

CyberTek Tech Festival 2024

2024

CyberTek Tech Festival (5af19b7a-ee9c-4cc8-9e47-2aad8ec9199)CyberTek Tech Festival 2024

I attended as a volunteer a two-day festival in Katowice, earning CPE credits through lectures on advanced topics in OT cybersecurity, incident response, and risk analysis.

Pre Security

2024

TryHackMe | Cyber Security Training (THM-JQPSIP1Q26)

Pre Security

I gained foundational knowledge in cybersecurity, including networking, operating system basics, and security principles.

Introduction to Cyber Security

2024

TryHackMe | Cyber Security Training (THM-FPKWGYOCUT)

Introduction to Cyber Security

I acquired comprehensive skills in cybersecurity, covering defensive strategies, SOC operations, digital forensics, and ethical hacking.

Getting Started with ThreatGEN® Red vs. Blue

2024

ThreatGEN (o8zktplxd)

Getting Started with ThreatGEN® Red vs. Blue

I completed training on ThreatGEN® Red vs. Blue game-based cybersecurity simulation, focusing on live defensive and offensive operations.

Red vs. Blue Cyber Simulation Range

2024

ThreatGEN (s8fayxwlv)

Red vs. Blue Cyber Simulation Range

I competed in live, head-to-head cybersecurity simulations, defending and attacking computer networks and industrial systems.

Solutions Development

AI

Process Automation

Cybersecurity

PROJECTS

Software solutions using AI and data management. I focus on practical applications that streamline processes and improve UX. Above all, I care about building solutions that take the need for repetitive tasks off the shoulders.

Caption Generator for Framed Art for JanAr company - A GUI application (Streamlit) using GPT models to automatically generate engaging captions for social media portfolios. Created for the glass workshop and picture framing company 'JanAr', it combines the power of GPT-4-Vision with a structure that encourages engagement under posts.

Research Automation, Presentation Structure, and Narration, and the skeleton for a series of educational films - A project automating 80% of the work in creating educational video series, using Custom GPTs, Python, and DALL-E to create comprehensive topic outlines. Produces engaging educational content sequentially.

Configurable Bulk Recipe Generator - A simple GUI application using the OpenAI API to generate recipes tailored to individual user goals, with many configuration options.
